SUMMARY

Detail-oriented MERN Stack Developer pursuing an MCA, experienced in architecting full-stack web applications with MongoDB, Express.js, React.js, and Node.js. Proficient in designing responsive UIs, secure RESTful APIs, and scalable database schemas. Strong foundation in MVC architecture and modern authentication mechanisms, driven to deliver impactful, user-centric software solutions.

EDUCATION

Master of Computer Applications (MCA)

2025 – 2027

Poornima University

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MySQL

Authentication: JWT, Passport.js

Tools: Git, GitHub, VS Code

Core Concepts: Data Structures, OOPs, MVC Architecture

PROJECTS

BingeTix | *MongoDB, Express.js, React.js, Node.js* | [Live Demo](#)

- Architected a scalable full-stack movie ticketing application using the MERN stack, enabling seamless browsing, dynamic showtime discovery, and interactive seat selection.
- Engineered a responsive client-side interface with React.js, utilizing modular components to optimize user workflows for event discovery and booking.
- Designed and implemented RESTful APIs using Node.js and Express.js to facilitate efficient data exchange for movie catalogs and theater scheduling.
- Structured a robust backend with MongoDB to handle persistent data storage, laying the groundwork for secure authentication and real-time payment integrations.

HeavenHomes | *Node.js, Express.js, EJS, MongoDB, Mongoose, Passport.js, Cloudinary* | [Live Demo](#)

- Developed a comprehensive property listing platform using Node.js, Express.js, and EJS, allowing users to efficiently manage, discover, and edit real estate listings.
- Implemented robust user authentication and role-based authorization via Passport.js to secure sensitive routes and protect user-specific property modifications.
- Enforced a strict MVC architecture to ensure code maintainability, cleanly separating controllers, Mongoose models, routing logic, and EJS view templates.
- Integrated advanced middleware for reliable request validation and seamless media handling via Cloudinary for dynamic property image uploads.

TaskFlow | *MongoDB, Express.js, React.js, Node.js, JWT, Gemini API* | [Live Demo](#)

- Engineered a full-stack Kanban-style project management tool utilizing React.js and Node.js, allowing users to organize tasks, track workflow progress, and manage project boards.
- Integrated the Gemini AI API to dynamically analyze task complexity and priorities, automatically generating intelligent time estimates to optimize user productivity and sprint planning.
- Secured backend operations with JWT authentication and HTTP-only cookies, safeguarding API routes and maintaining strict session integrity across user workspaces.
- Developed comprehensive CRUD capabilities using Express.js and MongoDB, managing complex data relationships for task priorities, deadlines, and board assignments.

Personal Portfolio Website | *React.js, JavaScript, HTML5, CSS3, GitHub* | [Live Demo](#)

- Developed a responsive, interactive personal portfolio using React.js and modern CSS3 to showcase technical projects, skills, and academic achievements.
- Optimized application performance and maintainability by structuring the UI with reusable React components and enforcing best practices in modern web design.
- Integrated streamlined navigation, dynamic project showcases, and direct contact functionalities to establish a cohesive and professional online presence.
